

CP-WL HIGH DENSITY CONVOLUTED WHEELS

The CP-WL products are open-structure convoluted wheels produced with High Density SCOTCH BRITE non-woven nylon fibre fabric.

Their own characteristics give these wheels a very long life. They can be used on manual or automatic machines.

APPLICATIONS

METAL

These wheels are suitable for any type of micro-deburring and for strong removal.

STANDARD PRODUCTION				STANDARD DIMENSIONS

				350	203

MF-WL (METAL FINISHING) CONVOLUTED WHEELS

The MF-WL (METAL FINISHING) products are open-structure convoluted wheels produced with SCOTCH BRITE lubricant incorporated non-woven nylon fibre fabric.

They can be used on manual or automatic machines.

APPLICATIONS

METAL

These wheels are particularly suitable for decorative satin finishing and for coveringmarks on metal surfaces.
