

GP-WL (TYCRO-GENERAL PURPOSE) CONVOLUTED WHEEL

The GP-WL (TYCRO-General Purpose) products are close-structure convoluted wheels produced with SCOTCH BRITE non-woven nylon fibre fabric.

These wheels work well in difficult situations and complicated shapes due to their compact characteristics.

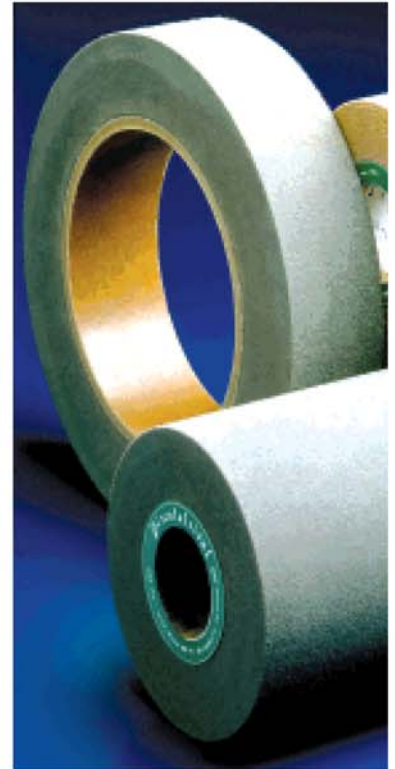

APPLICATIONS

METAL

GP-WL wheels are used for satin finishing of metals, and for micro-deburring on printed circuits.

WOOD AND PAINT

The wheels, after being shaped, are used for buffing base coat paints when there are two or more coats applied to the picture moulding or profile in general.

STANDARD PRODUCTION			
PRODUCT REFERENCE	COLOUR	GRAIN	DENSITY
ALUMINIUM OXIDE			
GP-WL A/MEDIUM	Brown	120	6
GP-WL A/FINE	Brown	240	6
GP-WL A/VERY FINE	Brown	320	6
SILICONE CARBIDE			
GP-WL S/FINE	Dark Grey	240	6
GP-WL S/VERY FINE	Dark Grey	320	6
GP-WL S/SUPER FINE	Dark Grey	400	6
GP-WL S/ULTRA FINE	Dark Grey	600	6

STANDARD DIMENSIONS	
OUTER Ø	INNER Ø
150	25
200	76
