

HORSEHAIR WIRE BRUSHES

Horsehair wire brushes are produced by using horsehair wires inserted and locked in a special plastic core.

APPLICATIONS

WOOD AND PAINT

They are used as wheels to work on profiles, and as long rolls to work on panels for dust removing operations, wax, patina and stain wiping.

These wheels are also solvent resistant.

STANDARD PRODUCTION			
OUTER Ø	CORE Ø	INNER Ø	WIRE LENGTH MM.
150	100	30/40/50/60	25
155	100	30/40/50/60	27,5
200	145	30/40/50/60	27,5
200	100	30/40/50/60	50
220	140	30/40/50/60/70/80	40
250	130	30/40/50/60/70/80/90	60

The wire length changes according to the outer core diameter.

TAMPICO WIRE BRUSHES

Tampico wire brushes are produced by using tampico wires inserted and locked in a special plastic core.

APPLICATIONS

WOOD AND PAINT

They are used as wheels to work on profiles and long rolls to work on panels for dust removing operations.

They are solvent resistant.

STANDARD PRODUCTION			
OUTER Ø	CORE Ø	INNER Ø	WIRE LENGTH MM.
150	100	30/40/50/60	25
155	100	30/40/50/60	27,5
200	145	30/40/50/60	27,5
200	100	30/40/50/60	50
220	140	30/40/50/60/70/80	40
250	130	30/40/50/60/70/80/90	60

The wire length changes according to the outer core diameter.
